## Weekly STEM Enrichment - Optional STEM Fun!

WEEK OF: May 18 - May 22

Try Just One or Try Them ALL! Only Rule is HAVE FUN!

### SCIENCE

*Growing Groceries*

*If you*

*have some lettuce, green onion, celery, or cabbage left over from your groceries... then cut them and place in water, set in a sunny spot. Watch them grow, plant outside in soil, continue to cut and enjoy through the summer!*

### TECHNOLOGY

*WEEKLY Option!*

*Show off your awesome coding skills you have learned in STEM class....*

*Here a few fun websites to try!*

<https://code.org>

<https://www.kodable.com>

<https://scratch.mit.edu>

<https://tynker.com>

### ENGINEERING

Create Lego Challenge Cards for your whole Family!

1) Use notecards or cut up paper to make your own.

2) Write a Lego Challenge (if you don't have Legos pick another building material to make cards for!) Write one on each card. Here are a few ideas...

- Make a castle out of Legos
- Build your name with Legos

### MATH

**A few different ideas for fun outdoor math games you can create!**

(If you don't have chalk, you can be creative and see what you can come up with...and, as always, you can create this on paper!)

**Design outdoor math board games. Examples:**

- Make something using only 10 Legos
- Remember your ideas are the best!!

3) Hand the cards out to your families and have them complete your challenge cards! Make sure you do some too!!!

**Skip count along a hopscotch**

**Math Facts Hopscotch**

Challenge kids to a game of hopscotch, multiplication hopscotch that is. Get some fresh air while skip counting and hopping!
